

Pick it to Win it

“Pick it to Win it” can be played as a game format or a side bet.

V1: Prior to the start of the round each player predicts how many putts they will have in that round. You can play this game against the entire field or play it in flights that are based on a player’s handicap. Player(s) that predict correctly are the winner(s). If there are no players that match their predictions, then pay the player(s) that get the closest to their prediction. (Over/under their predictions can also help break ties.)

V2: Prior to the start of the round each player predicts how many putts they will have on the front 9 and on the back 9.

V3: Prior to the start of the round each player predicts their total scores on par 3’s. (ex: $3+4+5+3=15$)
