

Putts with a Twist...

“Putts with a twist” is another side bet game. In the popular side game of “Putts” the players keep track of the number of putts they make in their round and then the player with the lowest number of putts wins. Now we will add the “*twist*”, instead of paying the lowest number of putts now you will pay the most one (1) putts. It's very simple: Keep track of your number of putts throughout the round. Then report how many one (1) putts you achieved on the front 9, back 9 and over 18 holes.

Variations:

- Play within flights; divide the field, by handicap, into two or three flights. Then have a front 9, back 9 and an 18 hole winner in each flight.
- Again play within flights but this time instead of tracking one (1) putts in all the flights have the “A” flight pay the most one (1) putts and have the “B” flight pay the most two (2) putts.
